

## MORETTI CONSTRUCTIONS

External waterproofing of roof tops with UV stable liquid membrane.

---

### Overview

**Property Type:** Residential Apartments

**Scope:** External waterproofing of roof tops with UV stable liquid membrane.

**Applicator:** Leakfree Waterproofing

**Area m<sup>2</sup>:** 320m<sup>2</sup>

**Category:** Waterproofing

---

### Products Used

- WPA 460 Epoxy Primer
- WPA 235UV Membrane

---

### Project Details

External waterproofing of roof tops with UV stable liquid membrane.

Contractor Michael was concerned about membrane thickness after second coat so Bayset performed some thickness testing on the membrane and instructed Leakfree Waterproofing to apply a 3rd coat.

Clean & prepare substrate, apply WPA 460 primer, then apply 2-3 coats of WPA 235UV to get required 1mm film thickness.
