Adverse physicochemical, human health and environmental effects:

No other hazards

**GHS label elements, including precautionary statements**

The product is not classified as hazardous according to Australia WHS 2 (2021).

**Other hazards which do not result in a classification**

Other Hazards: No other hazards

This product contains crystalline silica (quartz sand). IARC has classified crystalline silica as a Group 1 carcinogen. Both IARC and NTP consider silica as a known human carcinogen. Evidence is based on the chronic and long-term exposure workers have had to respirable sized crystalline silica dust particles. Because this product is in liquid or paste form, it does not pose a dust hazard; therefore, this classification is not relevant. (Note: sanding of the hardened product may create a silica dust hazard)
