 WPA 200 System  
 WPA 230 UV System  
 TPA 501R  
 WPA 500 System  
 TPA 401M  
 Hychem Supafloor

Waterproofing application and tile installation in a Residential Apartment Building.

In the residential apartment building, a meticulous waterproofing application was performed to safeguard against moisture intrusion, ensuring structural integrity. Simultaneously, a professional tile installation process was carried out, enhancing the aesthetics of the living spaces while providing durable and water-resistant surfaces. These critical steps contribute to the longevity and quality of the building, meeting both functional and aesthetic requirements.
