

HAYMAN ISLAND RESORT HAYMAN ISLAND QLD 4801

Date: January 2019
Project: Insurance Refits
Applicator: Woollam Constructions
Applicaton: Waterproofing

PRODUCT USED

CTA Prohesive MEGALITE
LATICRETE Systems
WPA 360
WPA 560
WPA 230UV

Following significant damage caused by Cyclone Debbie, Hayman Island underwent major insurance refits. This commercial property project, managed by Woollam Constructions, encompassed both waterproofing and tiling. Waterproofing covered an area of 490 square meters, while tiling extended across 4000 square meters.

CASE STUDY

PRODUCTS SPECIFIED

METHODOLOGY

For this extensive undertaking, various high-quality products were specified, including CTA Prohesive MEGALITE and Laticrete Systems for the kitchen and pool areas. Additional waterproofing products featured WPA 360, WPA 560, and WPA 230UV, ensuring the successful restoration and resilience of Hayman Island, which serves as a testament to effective project management and construction following natural disasters.
