The Waldheim St Residential project in Annerley, Queensland, involved an extensive waterproofing endeavour within a multistory residential building. This comprehensive scope covered the waterproofing of various critical areas, including the basement, planter boxes, windows, wet areas, and balconies. The project was entrusted to R & K Complete Coatings, a reputable applicator in the field of waterproofing.

CASE STUDY

PRODUCTS SPECIFIED

METHODOLOGY

To ensure the effective waterproofing of these diverse spaces, a range of specific products were carefully specified. These included WPA 460, WPA 990 PU, WPA Elastoband, WPA 230 UV, WPA 500, and WPA 360. These high-quality materials were instrumental in safeguarding the residential building against water-related issues, contributing to its long-term integrity and durability while meeting the diverse requirements of each area.
