

XYPEX MEGAMIX I

XYPEX
MEGAMIX I

*Concrete Waterproofing
By Crystallization™*

KEY BENEFITS

- > Excellent adhesion and bond to concrete substrates
- > Easy to apply
- > Fibre reinforced
- > Reduces surface absorption
- > Provides good surface for painting or as a final finished surface

Waterproofing, Flooring & Concrete Repair Industries

XYPEX MEGAMIX I THIN COATING FOR WATERPROOFING AND RESURFACING

Xypex Megamix I is a thin parge coat for the waterproofing and resurfacing of masonry or concrete surfaces, as a cap coat for Xypex Concentrate, or as an architectural rendering. Megamix I is a unique blend of cement, sand, fibres and proprietary chemicals. It is mixed with Xycrylic Admix to produce enhanced bond. Megamix I is applied by brush or trowel up to a thickness of 3/8 in. (10 mm).
